Cant Park is still struggling to get any significant numbers of cattle off the farms and into the sale yards with both the prime and store yardings on the small side today. With mainly clean up jobs happening in keeping with the time of year, all lines were small, with just a handful of store lines in double figures. 16 Hereford cows was the biggest line penned and sold for \$800/hd, or \$1.51/kg. The remainder of the store section were R2yr cattle and each line sold to their quality, with no real stand outs.

YARDED TALLIES	Prime		Store

431	241	190		

The prime sale was steady as she goes with very similar prices put forward to last week. Local trade cattle were slightly better though this was more of an indication of their quality than an improvement in the market, especially considering schedule prices eased this week. 2 buyers battled it out for the offering of prime cows and took home every pen bar three in this section.
